

Feature Included

Features/Benefits	Description	Windows SharePoint Services 3.0	Office SharePoint Server 2007 Standard CAL	Office SharePoint Server 2007 Enterprise CAL or for Internet Site
Collaboration	Real-Time Presence and Communication The enhanced real-time presence smart tag icon, displayed virtually everywhere a person's name appears in the system, tells users whether a person is online and available for a telephone or audio conference call, instant messaging, or two-way video conversation.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Social Networking Webpart Include Social Networking Web Parts that use information about your organization, communities, and electronic communications in Public My Site pages to help establish connections between colleagues with common interests.		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Standard Site Templates Windows SharePoint Services V3 includes the following standard collaboration site templates <ul style="list-style-type: none"> • Team site • Document workspace • Blank site • Blog • Wiki • Meeting workspaces (5 workspace types) 	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Wikis A wiki is a new site template in Windows SharePoint Services V3 that makes it easy to create, edit, link, and restore an individual Web page. Wikis can be used as creative forums to brainstorm ideas, manage knowledge bases, create designs as well as instruction guides or simply gather information in an easy-to-edit format. Wikis are easy to create, modify, and annotate; in addition to tracking contributions and changes. Key features include: <ul style="list-style-type: none"> • Fast and easy page creation • Easy and automatic linking • Version differences • WYSIWYG (what you see is what you get) Web page editing Wikis leverage existing SharePoint functionality including search, navigation, alerts, and custom fields.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Blogs Blogs provide a publishing-oriented experience for a single user or a team. Windows SharePoint Services V3 includes a site template that supports: <ul style="list-style-type: none"> • Article posting • Reader comments • Archive views • RSS feed generation 	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	People and Groups Lists People and Groups offer a unified place to find, communicate with, and manage people and their permissions, including support for custom fields such as Department, "Office #" and Area of Focus; in addition to the new Person field type. The Person field type creates rich displays of lists of people including support for a People Picker for browsing a list of users. Member Group provides: <ul style="list-style-type: none"> • Re-use of groups across sites • Distribution list for the members of the site 	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Calendars Calendars have been enhanced with richer calendar views, expanded support for recurring events, and all-day events.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Email Integration Document libraries, discussion boards, calendars, and announcements can be enabled to receive new postings via e-mail. In addition, extensible support is provided for custom e-mail handlers in Windows SharePoint Services V3. Similar to the functionality provided by public folders in Microsoft Exchange Server, e-mail enabled discussion boards support: <ul style="list-style-type: none"> • A highly scalable, topic-based architecture • New "super rich-text" field type • Unified experience for both e-mail and Web-based discussions • One-step creation of Active Directory distribution lists as part of the site creation process • Unified SharePoint group and Active Directory management functions 	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Task Coordination The new Project Tasks list template provides lightweight task management functionality including Gantt charts for visualization of task relationships and status.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Surveys Surveys now include conditional branching as well as support for inserting page breaks in long surveys such as annual employee satisfaction or and customer surveys.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Document Collaboration Improvements to SharePoint document libraries include: <ul style="list-style-type: none"> • Checking out documents locally • Offline document library support in Outlook 2007 • Major and minor version numbering and tracking • Support for multiple content types • Policy, auditing, and workflow • Tree view support 	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Issue Tracking The Issue Tracking list template has been updated to use the enhanced versioning and version-history storage features of Windows SharePoint Services V3.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Features/Benefits	Description	Windows SharePoint Services 3.0	Office SharePoint Server 2007 Standard CAL	Office SharePoint Server 2007 Enterprise CAL or for Internet Site
Enterprise Portal	<p>My Site Personal Site The My Site personal site gives users an opportunity to aggregate information “for me,” “by me,” and “about me.” Significant enhancements include social networking, privacy controls, SharePoint Sites and Documents Roll-Up Web Parts, and Colleagues and Memberships Web Parts.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Content Syndication Use RSS feeds to syndicate content managed in a portal site.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Privacy & Security Use authorizations to control visibility of information in a My Site public view.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Site Directory The Site Directory automatically creates a site map and presents it in an easy-to-use format. The enhanced directory now includes the option to scan for changed or deleted links to external content.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>User Profiles and the Profile Store User Profiles store personal information for system users. Improvements include multi-valued properties bound to taxonomy from Office SharePoint Server 2007, property-level security controls by person or group, open and closed vocabularies, and per-site property extensions. Profile synchronization and directory import support the extended capabilities of the User Profile Store with enhanced scalability and performance.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Audience Targeting Enables use of Web Part pages, Web Parts, and content to target distribution lists and groups in addition to SharePoint audiences.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Site Manager Manage a SharePoint site’s navigation, security access, and general look and feel using this easy drag-and-drop tool. Site Manager unifies site management tasks for portals and Web sites, including management of areas, pages, listings, SharePoint site lists, and associated component parts.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Mobile Device Support All SharePoint portal, team site, and list pages now render on international and North American mobile devices (including Web-enabled mobile phones) using a simplified text-only format.</p>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Portal Site Templates Preconfigured templates streamline creating, customization, and deployment of divisional portals, organization-wide intranet portal sites, and corporate Web sites.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>SharePoint Sites and Documents Roll-up Web Parts List all the SharePoint sites that a user is part of and documents the user has authored. The Documents Roll-up Web Part also supports more general capabilities for querying and filtering the documents stored in a collection of SharePoint sites.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Colleagues and Memberships Web Parts List people the user knows and people who belong to common distribution groups.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Integration with for Access 2007, Excel 2007, PowerPoint 2007, and Word 2007 Windows SharePoint Services V3 easily integrates with smart client tools through a set of Web services and documented application interfaces. Users can readily adopt these new tools because of their similarity to other familiar environments, such as the Microsoft Office system. For example, users of Microsoft Office Word, Microsoft Office Excel, Microsoft Office PowerPoint, Microsoft Office InfoPath, Microsoft Office Project, and Microsoft Office OneNote 2007 can directly interact with information stored in SharePoint sites without having to manually download the content. Users can create workspaces, post and edit documents, and assign tasks, all while working on documents stored in SharePoint sites.</p>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Integration with Outlook 2007 With Microsoft Office Outlook 2007, users can view calendars and contact lists stored on SharePoint sites, and create and manage sites for editing documents and organizing meetings. Outlook 2007 and Windows SharePoint Services V3 support a new set of significantly enhanced functionality including: <ul style="list-style-type: none"> • Read/write access to SharePoint items: calendars, tasks, contacts, discussions, and documents • Synchronization of offline support of document library and lists • Ability to check out and edit documents when offline • Roll-up views of calendars and tasks across multiple lists and sites • Unified view of personal and SharePoint tasks in Outlook 2007 </p>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	<p>Integration with SharePoint Designer Office SharePoint Designer 2007, based in part on Microsoft FrontPage technology, will provide tools for rich customization of sites, and creating reporting tools and application templates, without any coding.</p>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
